

JESA SA, MEMBER OF THE SWISS GROUP POLYGENA, IS AN ACTIVE INDUSTRIAL COMPANY SINCE 40 YEARS IN PRECISION BALL BEARINGS, PLASTIC INJECTION AND MIXED UNITS. WITH 130 EMPLOYEES, OUR COMPANY OFFERS INNOVATIVE PRODUCTS ESPECIALLY DEVELOPED FOR OUR CUSTOMERS FROM MODERN PRODUCTION SITES IN SWITZERLAND AND IN CHINA.
WE ARE LOOKING FOR A:

R&D TECHNICIAN Asian market

Your main tasks:

- Product development for Jesa's China and Asia market, ball or roller bearings solutions, overmolded ball bearings, plastic technical parts and mixed units
- Analysis of customer specifications, technical proposals, feasibility studies
- Offer and production drawings using AutoDesk design tools, calculations and simulations
- Team work with Sales Engineers, Application Engineers and Production Specialists at Jesa Shanghai and Jesa Wuxi
- Periodical business trips to China for customers and suppliers visits, and in order to build a strong partnership with Jesa Shanghai and Jesa Wuxi
- Optimization of existing products
- Be the internal expert regarding plastic and bearing production capabilities in China

You will be a member of the R&D Team (7 people). You will be based at Jesa's headquarters in Villars-sur-Glâne, Switzerland. You will travel 4-5 times a year to China.

Your profile:

- You are Mechanical Technician / Engineer with experiences in bearing and/or plastic parts design.
- You are Chinese or you have a great interest in Chinese culture.
- Having sense of responsibility, you are organised and structured. You enjoy working independently.
- You must have very good English skills (spoken and written) and good knowledge in French and in Chinese are assets.

Join us and participate actively to our success by your skills and qualities.
